

Digital Signage Displays & Display Kiosks

Located in New York, our 30000 sq. ft. facility includes state of the art manufacturing equipment, allowing Parabit to meet any design and production requirement. Through a full graphic design and engineering department, we provide services such as prototyping, integration and software development. By continually taking the time to study industry needs, we provide the ultimate displays while maintaining the reputation of being a dynamic solution provider.

Craftsmanship

Our team of experienced craftsmen have the knowledge, skill and dedication to bring your architectural ideas to life.

Fabrication

Parabit's facility includes technologically advanced equipment necessary to produce any product using a variety of substrates such as solid wood, veneered products, laminated material and Corian surfaces to name a few. Our capabilities also allow us to utilize a variety of finishes to match your branding and price point.

Installation

Parabit Systems offers complete on-site services providing the highest degree of management over quality and workmanship.

Tablet Display

Digital Signage Displays & Display Kiosks

Parabit takes pride in the attention we give to every client's project and on the technical proficiency of our staff. We work closely with architects and general contractors to insure all participants have the information they need to complete the project efficiently. From concept to completion, our dedicated staff will provide on site measuring, scheduling, project reports and delivery coordination to complete the project as planned.
