

ID The Solution Is Your Facility Safe? Are You Sure?

Since 1995, Parabit has studied every nook and cranny of the self-service industry with focus on providing the ultimate visitor management solution. We listened to your needs and addressed various security concerns. Combined with a skilled team of engineers, designers, IT guru's, fabricators and an Authorized Network of Installation/Service Partners, we introduce the Visitor Management Kiosk.

Function

Parabit's Visitor Management Kiosks are equipped with state of the art technology for high traffic areas and unsupervised lobbies. The kiosks are integrated with EasyLobby Software; a robust self-service solution for visitor registration.

Helius

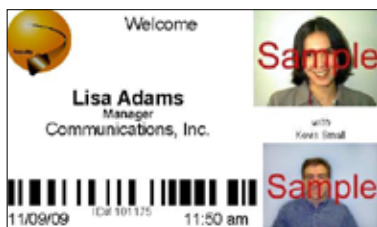

The Visitor Management Kiosk captures the visitor's photo by either scanning a license, passport, or by taking a photo with a web cam. Easy Lobby then verifies whether the visitor is expected or has been in the facility before and makes sure the visitor is not on a watch list.

The system can also pre-register visitors to more tightly control of who is authorized to enter your facility. Upon arrival, kiosk users can print full color and customized badges. The check in process is convenient as it takes less than 20 seconds.

Sample Kiosk Interface & Badge

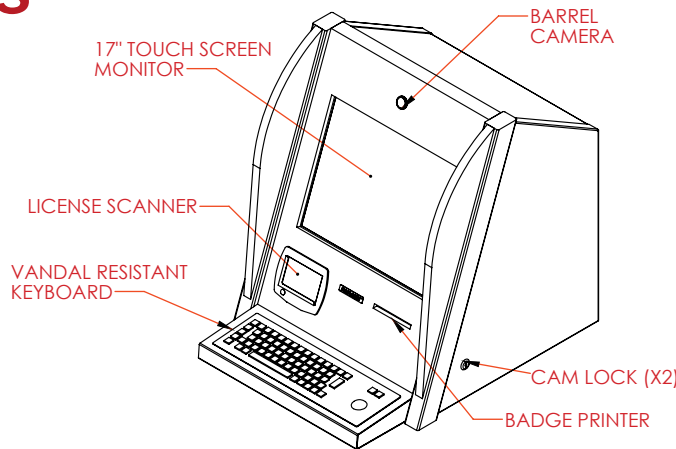

Benefits of Identification Kiosks include:

- Available in many languages
 - Multiple programmable security alerts
 - A more professional, security-conscious image to your visitors
 - Automated online Denied Party and Sex Offender screening
 - Easily generate a full range of reports and search the database
 - Print professional looking, full color, customized badges by visitor type
 - Enable any or all employees to pre-register their visitors via the intranet/internet
 - Streamline the check-in process (less than 20 seconds from entry to printed badge)
 - Capture detailed visitor information quickly and accurately to identify, badge and track
 - One click Emergency Evacuation report
- (this list can also be automatically e-mailed to external fire, police, emergency response personnel)
